# Get off to a flying start...

The first three months of the year are crucial. What you do with them can make the difference between securing your 2019 goals, or spending the following nine months playing catch up.

These three months are also a time of opportunity for change and growth. That's why people traditionally start them by making resolutions.

But New Year's resolutions seldom last, because anything really worth resolving needs both accountability and support.

While others quietly abandon their resolutions, work with Andy to ensure you are already ahead of the game by the time Spring arrives.

# How it works...

**1 x 2 hour call:**

**Strategy 2019**

What's your big idea? What do you want it to look like in a year, and therefore in 90 days?  
Where's the juice going to come from?

**1 x 2 hour call:**

**Game plan**

Key steps, resources to acquire, people to influence, potential enablers and blockers

**10 x 30 min calls**

**Accountability and support**

How are you progressing? What's working? What isn't? What are you learning? Troubleshooting, seizing emerging opportunities

# What you can use it for...

There is no substitute for dedicated interactive support. In my work with individuals, my focus is simply this: to help them make a stand-out, career-transforming impact whatever stage they are at in their leadership journey. For example, I've helped:

- New Chief Executives to set their strategy and turn it into action.
- Senior leaders to move ahead with crucial decisions, key promotions, handling dissent among their senior team and influencing difficult people.
- Newly appointed leaders to turn around struggling departments.
- Workaholics to achieve more life balance while maintaining or improving performance.
- Individual entrepreneurs to refine, plan for and achieve their goals.
